WORK/PROJECT EXPERIENCE

Coracle

May 2021 - August 2021

Programming Intern

Austin, Texas

- Debugged faulty Java code on a daily basis
- Edited code, specifically reduced amount of lines code needed
- Collaborated with employees to code backup systems for GE (General Electric)

Corkscrew Corporations

June 2020 - September 2020

Programming Intern

Houston, Texas

- Utilized Django within Python to maintain and update their web app
- Used Python to create an algorithm that helped user data collected on their website automatically organize itself

Projects:

- Developed an app with a team of developers that gives boat drivers optimal sea/lake routes to avoid traffic and rip currents using Python
- Created a personal app that helps fantasy football owners determine the hottest players to trade for, which players to start/bench and who to draft based on skill and injury durability. Used Java
- Used HTML 5 to create a personal website to advertise myself to various potential employers

EDUCATION

Texas A&M University

June, 2021

BS in Computer Science

College Station, TX

- GPA: 3.98, Engineering Honors Society
- Studied abroad in Texas A&M University at Doha, Qatar during my fall semester of my junior year
